

## VOICES TO IGNITE CLIMATE ACTION

## ABOUT THE PROGRAM

Empowering youth to engage in policy making and negotiations is imperative in today's world. The Climate Reality Project India & South Asia is collaborating with partners who share a commitment to nurturing the next generation of climate leaders. Through "Youth 4 COP," our aim is to equip young minds with essential skills and empower them to contribute to a better future for all. Today's youth are the stewards of our planet, holding the key to effecting meaningful change.

Our program seeks to provide young participants with a deeper understanding of COP processes and deliberations. They will be trained to articulate their ideas, concerns, and solutions effectively, ensuring their voices are heard. Furthermore, they will learn how to navigate the complexities of the COP platform, preparing them to actively participate in future deliberations.

## GOALS

**Develop Negotiation and Leadership Skills**

**Bridge the gap between the Global North and the Global South**

**Enhance COP process awareness via various media platforms.**

# PROGRAM STRUCTURE

# BENEFITS
